

CannaScope Beta V5

Connecticut Cannabis Transparency Report

Source-Verified Consumer Awareness & Testing Pattern Review

Report #1 | PASS WITH WARNINGS

Created: 2026-06-02 3:57 PM EDT | Dataset Window: 2026-04-03 to 2026-06-02

Every flag is a lead, not a conclusion. CannaScope Beta V5 does not claim fraud, unsafe product, or legal failure unless the live COA and the applicable Connecticut legal limit directly support that claim. Verify every product against its COA.

1,198 reviewed • 108 validated findings • 0 Do Not Consume • 20 High Caution • 31 Moderate Caution • 44 High Cannabinoid

Contamination severity (per measurement): RED = Near / over CT limit ORANGE = Elevated YELLOW = Above CannaScope threshold GREEN = Below threshold

Testing Date is the COA's test / sample date (never the report-generation date). CT % Of Limit = measured ÷ Connecticut legal limit × 100. CannaScope Limit is the stricter consumer-awareness threshold (Yeast & Mold / Aerobic = 10,000 CFU/g; other contaminants = 50% of the CT limit). Every COA number is a clickable link.

Executive Summary

Reviewed	Validated Findings	Do Not Consume	High Caution	Moderate Caution	High Cannabinoid
1,198	108	0	20	31	44

Infused & Extract Potency Comparison Reference

This section exists to compare concentrated products (infused pre-rolls, hash/THCA-infused items, vapes, concentrates, extracts) against normal flower. High potency here is expected by design — reference only, NOT a flower abnormality.

Product	Testing Date	Producer	Lab	Highest Cannabinoid %	COA

Possible Remediation / Unusually Low Microbial Load Review

This is NOT proof of remediation. It is a consumer-awareness lead based on unusually low or ND microbial readings (non-infused flower) and should be verified against the live COA. Low microbial counts can be entirely normal.

Lower-Concern Products

Non-infused flower with NO contaminant flag, a valid numeric Total THC, and a normal nonzero yeast & mold (200–5,000 CFU/g). Not endorsed as safe.

Not enough non-infused flower with a normal-range yeast & mold reading this run.

Lower-Concern Candidates — Potency Data Missing (67): otherwise-clean flower whose Total THC is missing or a parser conflict — verify potency on the COA.

Every flag is a lead, not a conclusion. Verify against the live COA.

No Significant Findings

These categories were tested and parsed, but no result crossed the CannaScope threshold in this run (verified against the raw parsed data).

Category	Parsed / Total	Result
Cadmium	614/1198	No result crossed the CannaScope threshold.
Mercury	614/1198	No result crossed the CannaScope threshold.
Mycotoxins	627/1198	No result crossed the CannaScope threshold.
Residual Solvents	580/1198	No result crossed the CannaScope threshold.
Pesticides	1193/1198	No result crossed the CannaScope threshold.
Pathogens	1193/1198	No result crossed the CannaScope threshold.

Every flag is a lead, not a conclusion. Verify against the live COA.

Validation & Diagnostics

Supporting validation detail. Findings above are the report; this documents how they were checked. Status: PASS WITH WARNINGS.

Self-Audit

Check	Count	Status
Infused/extract products in High-THC Flower Review	0	None
Scientific-notation-tier values needing plain display	0	None
Potency parser conflicts (Total THC 0% vs active ≥35%)	62	Fixed
Flagged rows without a COA link	0	None
Flagged rows not COA-verified (routed to COA Verification Queue)	0	None
Producers with unverified DBA	0	None
Duplicate COA rows	0	None
Zero-result sections suspected to be parser errors	0	None

Every flag is a lead, not a conclusion. Verify against the live COA.

COA Verification Queue

(0) flagged rows whose live COA could not be confirmed. Excluded from findings until verified.
