

CannaScope CT Beta V6.1

Connecticut Cannabis Transparency Report
Source-Verified Consumer Awareness & Testing Pattern Review

Report #1 | **PASS WITH WARNINGS**

Created: 2026-06-02 7:26 PM EDT | Dataset Window: 2024-01-01 to 2024-12-31

Every flag is a lead, not a conclusion. CannaScope CT Beta V6.1 does not claim fraud, unsafe product, or legal failure unless the live COA and the applicable Connecticut legal limit directly support that claim. Verify every product against its COA.

5,041 reviewed • 676 validated findings • 1 Do Not Consume • 114 High Caution • 376 Moderate Caution • 134 High Cannabinoid

Contamination severity (per measurement): RED = Near / over CT limit ORANGE = Elevated YELLOW = Above CannaScope threshold GREEN = Below threshold

Testing Date is the COA's test / sample date (never the report-generation date). CT % Of Limit = measured ÷ Connecticut legal limit × 100. CannaScope Limit is the stricter consumer-awareness threshold (Yeast & Mold / Aerobic = 10,000 CFU/g; other contaminants = 50% of the CT limit). Every COA number is a clickable link.

Executive Summary

Reviewed	Validated Findings	Do Not Consume	High Caution	Moderate Caution	High Cannabinoid
5,041	676	1	114	376	134

Top Heavy Metal Findings

Pathogen Findings

Zero-tolerance pathogen reported DETECTED (do-not-consume if confirmed).

#	Product	Testing Date	Producer	Pathogen	COA
1	Brix Cannabis Second Cut Soap (s) 00072	2024-10-23	Brix Cannabis	Pathogenic Aspergillus DETECTED	MMBR.0025461

Every flag is a lead, not a conclusion. Verify against the live COA.

High Cannabinoid Content / High THC Content Findings

Non-infused flower with a reliable cannabinoid reading above 35% — identifying unusually high cannabinoid content for review, not an accusation. Testing date and lab help reveal patterns.

Infused Products — Potency Reference

Infused FLOWER products only — infused joints, blunts, and pre-rolls (flower with added concentrate). High potency is expected by design — reference only, not a flower abnormality. Vapes / concentrates / extracts are NOT included here; they have their own section below.

Possible Remediation / Unusually Low Microbial Load Review

This is NOT proof of remediation. It is a consumer-awareness lead based on unusually low or ND microbial readings (non-infused flower) and should be verified against the live COA. Low microbial counts can be entirely normal.

Lower-Concern Candidates — Potency Data Missing (52): otherwise-clean flower whose Total THC is missing or a parser conflict — verify potency on the COA.

No Significant Findings

These categories were tested and parsed, but no result crossed the CannaScope threshold in this run (verified against the raw parsed data).

Category	Parsed / Total	Result
Arsenic	340/5041	No result crossed the CannaScope threshold.
Mercury	340/5041	No result crossed the CannaScope threshold.
Mycotoxins	4475/5041	No result crossed the CannaScope threshold.
Residual Solvents	1295/5041	No result crossed the CannaScope threshold.
Pesticides	5032/5041	No result crossed the CannaScope threshold.

Every flag is a lead, not a conclusion. Verify against the live COA.

Validation & Diagnostics

Supporting validation detail. Findings above are the report; this documents how they were checked. Status: PASS WITH WARNINGS.

Self-Audit

Check	Count	Status
Infused/extract products in High-THC Flower Review	0	None
Scientific-notation-tier values needing plain display	0	None
Potency parser conflicts (Total THC 0% vs active ≥35%)	23	Fixed
Flagged rows without a COA link	0	None
Flagged rows not COA-verified (routed to COA Verification Queue)	0	None
Producers with unverified DBA	0	None
Duplicate COA rows	0	None
Zero-result sections suspected to be parser errors	0	None

Every flag is a lead, not a conclusion. Verify against the live COA.

COA Verification Queue

(0) flagged rows whose live COA could not be confirmed. Excluded from findings until verified.

Zero-Result Verification Queue

Category	Flagged	Parsed / Total	Status
Yeast & Mold	241	4642/5041	OK
Total Aerobic Bacteria	167	4676/5041	OK
